### DIRECTIONS FOR USE

For the rapid removal of all floor finishes and waxes from resilient flooring including: vinyl, vinyl asbestos, vinyl composition, asphalt, linoleum, and rubber tiles. Also ideal for finished non-resilients such as: terrazzo, marble, ceramic, quarry tile, ceramic, quarry tile, concrete, and poured epoxy flooring. Although excellent for any type of equipment, greatest savings are realized when using automatic scrubbing equipment.

Dilute **BARE BONES®** following dilution recommendations below. Dilute using cold or mildly warm water only.

Light/Normal Buildup: 8 oz per gallon of water (1:16)

Heavy Buildup (Burnished): 20 oz per gallon of water (1:5)

**Mop/Wet Vacuum Stripping System:** Apply liberally with a mop to an area small enough so as not to allow the product to

dry and allow to stand for 3 to 5 minutes. Agitate with a mop and remove solution and old finish with a wet vacuum. Allow floor to dry thoroughly and apply new finish as directed by manufacturer. If complete stripping is not accomplished repeat the above procedure before re-application of recommended NCL Floor Finish.

**Floor Machine Stripping System:** Allow to stand for 3 to 5 minutes, scrub with a rotary floor machine or automatic scrubber equipped with stripping pads. Remove solution and old finish with a wet vacuum and allow floor to dry completely. If desired, a rinsing step can be added. Apply recommended NCL Floor Finish as per instructions.

**Note: Asphalt tile, Linoleum, and other sensitive floor surfaces may be damaged by contact with stripping solution. We recommend that a spot test be conducted before general use.**
