DISPENSING DIRECTIONS:

Attach READY-SET-CLEAN® (RSC) Dispensing Unit to the bottle by threading the unit onto the bottle and tighten securely. Attach water hose to the gun and dispense product by squeezing the flow control handle. Use the locking switch if desired for "hands free" filling of buckets and automatic scrubbers.

NOTE: The READY-SET-CLEAN® Dispensing Unit is designed for use with any and all RSC products. Dilution tips built into the product containers provide precise, accurate dilution for every product, every time.

DIRECTIONS FOR USE:

FOR SPRAY & WIPE/MOP & BUCKET/AUTO SCRUBBING APPLICATIONS: Dispense SHA-ZYME™ Cleaner solution from the READY-SET-CLEAN® Dispensing Unit into a sprayer, mop bucket or automatic scrubber at a dilution rate of 1:64 (2 oz per gallon). Use cold tap water only. **For Spray and Wipe Applications:** Apply cleaner solution directly onto the surface to be cleaned. Allow solution to penetrate grease and soils. If needed, brush with a stiff bristle brush. Wipe dry with a clean microfiber cloth. **For Mop & Bucket/Autoscrubbing Applications:** Apply cleaner solution using a mop or automatic scrubber. Allow solution to penetrate grease and soils. If needed, brush with a stiff bristle brush. Remove solution from the floor. Rinse if necessary.

NOTE: Improper use or dilution may cause damage to surfaces and may increase the risk of health effects.

DISPOSE OF UNUSED PRODUCT IN ACCORDANCE WITH LOCAL, STATE AND FEDERAL REGULATIONS - PLEASE RECYCLE CONTAINER

PPE INFORMATION: Respiratory protection is generally not required. No special ventilation is normally required. The use of safety glasses is recommended. No other protective equipment is required.
