

A New Approach in Carpet Cleaning Technology!

The carpet in your facilities provides a combination of beauty, vibrant color and comfort for employees and guests. Proper maintenance of your carpeting investment will provide extended fiber life and performance. You need the proven formulations found in the Carpet Care Solutions™ System from National Chemical Laboratories to insure beautifully clean carpets.

This comprehensive system of cleaners, spot removers, protectors and accessory products offers your facility a simple, cost effective program for maintaining carpets. Utilizing cutting edge formulations with either our exclusive **Powder Encapsulation Technology EPT™** or our exclusive, premium quality **Crystal Encapsulation Technology ECT™**, your carpets will be beautifully cleaned with a greatly reduced potential for re-soiling, a major reason for premature destruction of carpet fiber. Encapsulating cleaners envelop soils with a crisp, non-sticky residue that is easily removed by routine vacuuming.

The result is exceptionally clean, beautiful carpeting that stays cleaner longer!

What is ECT™ Encapsulation Technology

Encapsulation technology formulas release soil from carpet fiber, surround or encapsulate the soil, and finally upon drying form a non-sticky powder that can be easily removed with a vacuum. Our premium ECT™ encapsulation technology incorporates specialized crystalline forming ingredients.

Premium ECT™ encapsulation results in the driest, most friable crystalline residue that is available in carpet care products today. Products based on this encapsulation technology are an integral part of a Low Moisture Carpet Cleaning Program. Encapsulation technology reduces the demand for water in the carpet cleaning process.

With encapsulation technology there are not sticky detergent residues that require large amounts of rinse water to flush them out. Using less water reduces or eliminates discoloration caused by wicking.

Carpet Care Solutions

Carpet Care Solutions™ Product Systems

Low Moisture Encapsulation Products

Encapsulating Carpet
Brush / Bonnet Cleaner

A revolutionary solution for maintaining today is carpeting. ALL-IN-ONE™ incorporates our premium ECT™ technology, which encapsulates soil and dries to a non-sticky crystal. Soil and residue then vacuum out easily! This low moisture process formula eliminates the need for rinsing and minimizes carpet downtime. Stops discoloration problems caused by wicking. ALL-IN-ONE™ also contains an effective malodor counteractant and a universal fresh fragrance.
